Vibe Coding, do you really think you're doing the right thing?

Ivanildo Barauna

Sr. Data Engineer at @MercadoLivre | Python | GCP | BigQuery | ETL Taboão da

Serra, São Paulo, Brazil

Summary

I'm a Data Analytics professional with solid experience in data production and consumption, focusing on the end-to-end journey of data as a product. I transform the data journey into decisive business insights.

In recent years, I've worked as a BI Analyst, Data Analyst, and Data & Analytics Engineer. During this journey, I've worked with Data Visualization, various ETL strategies, Data Modeling for Data Warehouses, Data Lakes, and Data Lake House, using a variety of tools and technologies, including Google Cloud Platform as a Cloud Provider, Google BigQuery as a Data Warehouse, Google Cloud Storage as Object Storage for large data integration and storage, Apache Beam as a distributed processing framework, AirFlow for pipeline orchestration, and extensive experience with SQL as a primary language, Power BI, and Looker Studio for Data Visualization, among other technologies.

I participated in projects aimed at migrating technologies, reducing data processing costs, and promoting Data Driven cultural education.

Strong analytical skills for defining business problems and finding answers and solutions through exploratory data analysis.

Strengths: Critical and analytical thinking.
